

OUR *sustainability* INITIATIVES

ENVIRONMENTAL PROJECTS

- Robert Mondavi Winery has invested in several energy-efficient projects: insulation of wine tanks, installation of on-demand Glycol system, replacement of air compressors with on-demand Variable Frequency Drive (VFD) units, use of more efficient pond aerators and the installation of high-efficient LED lights - resulting in more than 20% of ongoing reductions in electricity usage.
- The winery implemented a single-stream recycling program and installed a plastic bailer resulting in more than 60% reduction of the winery's solid waste sent to landfill in the first year.
- Replacement of four high-efficient hot water boilers and other gas-saving initiatives, resulting in more than 40% reduction in natural gas consumption annually.
- Food waste from The Vineyard Room Kitchen and employee lunchrooms, as well as the Winery's green landscaping waste, are collected and used to make organic compost at the Clover Flat Landfill managed by Upper Valley Recycling.
- The Winery's treated process wastewater is recycled for vineyard irrigation, and rain and well water are used for landscape irrigation, resulting in monthly water savings.
- A water recovery and reuse system was installed on the winery barrel handling line. Rinse water from the second washer is captured, reheated and used as the source for the primary barrel washer. The system is estimated to save around 50% of the water used to wash around 35,000 barrels each year.
- Implementation of water conservation programs, including repurposing retired steel fermentation tanks to collect runoff water for re-irrigation, save millions of gallons of water per year.
- Our "Green Team" meets quarterly to identify and address conservation opportunities. In addition, team members collect and recycle bottles at our Summer Concerts.
- The winery reports greenhouse gas and water footprint as part of Constellation Brands' corporate submission to CDP.

SOCIAL RESPONSIBILITY + COMMUNITY

- Our safety committee meets monthly to identify and address work safety concerns.
- The winery is an active member in local trade organizations and community groups including Nappa Valley Vintners, Winegrowers of Napa County, Oakville Winegrowers, Concierge Alliance Napa Valley, San Francisco Convention and Visitors Bureau, and Chambers of Commerce in Napa, Yountville, and St. Helena.
- The Robert Mondavi Winery is also active in the community hosting a Summer Concert Series to fund various community efforts like the Napa Valley Symphony and the Napa Valley Unified School district; and through the years has supported local art programs including the Oxbow School, the Lincoln Theater in Yountville, and the San Francisco Museum of Modern Art. It has also donated significant resources to the University of California, Davis.
