

# OUR *sustainability* INITIATIVES

**SVEDKA**  
IMPORTED VODKA

## ENVIRONMENTAL PROJECTS

- SVEDKA, produced by The Lantmannen Reppe Group purchased renewable energy for all their Scandinavian operations in 2014. This effort resulted in a carbon footprint reduction of 19% in the first year and has since contributed to year over year reductions.
- Projects focusing on the increase in energy efficiency and the phase-out of fossil fuels has helped The Lantmannen Reppe Group reduce the use of heating oil by over 70% since base year 2009.
- To date, The Lantmannen Reppe Group has reduced CO2 emissions by 36% in comparison to the base year 2009.
- The Lidköping Production facility utilizes municipal power fueled by waste (100% fossil fuel free.)
- The Lantmannen Reppe Group launched a green transportation initiative supporting CO2 reduction; 80% of the transportation currently contracted is fossil fuel free.
- Working to continuously develop sustainability in all parts of the grain value chain, Lantmannen launched the concept of 'Climate and Nature'. The concept provides a farming method for grain to reduce the environmental impact and consists of several criteria from sowing, to harvest and transport. Since the concept was launched in 2015, 'Climate and Nature' has reduced the company's overall carbon footprint by up to 20%.
- Publicly report greenhouse gas footprint as part of Constellation Brands' submission to the Carbon Disclosure Project.
